Smart School Features

Manual information management system involves heavy paper work. It is very tedious, costly, unsecured, time consuming, and yet prone to errors.

SmartSchool is equipped with a centralized database platform which totally eliminates manual filing system and ensures accurate, easy, and secure collation, storage, retrieval and sharing of information within the system.

- Get any information you want, either financial, academic, administrative or information from the archives anytime, on your desktop with just few mouse clicks, enabling you to make productive management decisions and intelligently.

- Facilitate the exchange of information and records amongst departments, units' classes, and campuses without accumulating volumes of paper documents.

- Save money on paper-based information storage systems. SmartSchool will store all your information in its database. It is safer, simpler, easily retrievable (a mouse click and get whatever information you need), more accurate, incorruptible, tamper-proof, and still saves you a lot of money.

S Smart School Features

Improve Relations with Parents ..

Communicate Better & Improve Relations with Students, Parents, Teachers, PTA, Exam Bodies, Educational Authorities, the Board & the Public:

Automated letter and report generation features in SmartSchool enable you to communicate better with all stake holders in the school project. With just a few clicks of the mouse, you can automatically generate customized letters or reports of all sorts for students, parents, teachers PTA, the examination bodies, education authorities and the general public, especially designed with your school's logo and other signets without the need for additional staff.

- The customized letters and Reports generally boost your school's image and strengthen the school's brand name.

- Because the letters and report are automatically generated by SmartSchool, you can readily increase the frequency and quality of your communication with these parties and still spare your time to concentrate on more strategic issues.

- Save money on stationery, as SmartSchool reduces your dependency on based communication.

Smart School Features

People don't care how much you know, until they know how much you care. Show parents how much you care for their wards. Generate extensive reports on each pupil. SmartSchool records not only student's academic performances but also tracks and records student's disciplinary activities and their participations and performances in extracurricular activities like; sports, travels, drama, database quiz, essays, exhibitions, and other competitions. This enables SmartSchool to generate reports on each student in these activities. This will go a long way in showing the parents how much hard work you have put in developing their child.

- Parents will be impressed with the detailed reports on their wards. This will boost their confidence in your school.

- They will share this experience with their neighbors and colleagues. This will boost your school's image amongst the general public.

- It will help parents understand their wards better and this will eliminate any misunderstanding between parents and the school authorities especially in issues concerning student's discipline.

- When pupils see that their performances in extracurricular activities are recorded and shown to their parents, it makes them feel loved and improves their love and confidence in their school. It makes them proud of their school, and encourages them to improve their performances in those activities.

- It will help in discovering and developing talents in your students thus earning your school a good reputation in that regard.

$\mathbf{S}$ Smart School Features

Generate Report Sheets
Automatically

Collate, Calculate, Compile Exam Records & Generate Report Sheets Automatically

With SmartSchool the hectic and time consuming manual process of students' result processing and generation is totally eliminated. All the teachers need to do is mark the exam papers and enter the students' marks into the system. SmartSchool will calculate and compile the marks of individual students in their respective subjects for the various classes, and automatically generates result sheets for each student and for each class. It will also generate other varying reports based on the results to help the school administration in analyzing students' and teachers' performances and the general efficiency of their teaching methods and delivery.
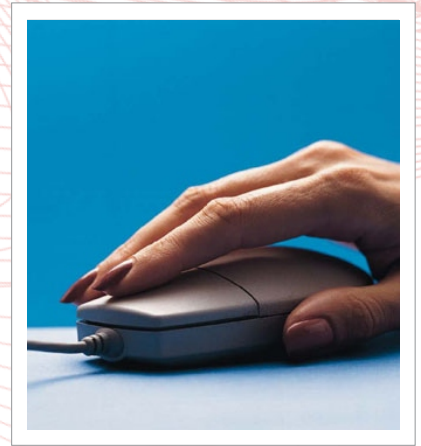

- Students' Exam Results Sheets are automatically generated immediately the scores are entered into the system.

- Teachers are saved the drudgery of calculating, compiling and manually entering results in result sheets.

- The image of your school amongst teachers is boosted, thus enhancing your ability to attract the best teachers to your school.

- You save useful time and use it to engage your teachers in more productive activities.

S Smart School Features

The usual manual processes create loopholes, require constant supervision, impede staff productivity and yet give room for errors and sharp practices. SmartSchool however, helps you to standardize your processes. It enforces the rules guiding your various processes (from admission to fees; from payroll to promotion), as predefined by the school management. It effectively eliminates any loss of property and/or income drain resulting from inconsistencies and human error that characterized manual processes. We have come across instances were irregularities in fees collection and other processes resulted in serious money losses. And these irregularities were discovered after the implementation of SmartSchool.

- SmartSchool will make impossible for your business rules to be broken whether you are there or not.

- It ensures a neater, faster, smoother, customer-friendly, and more accurate handling of your critical school processes like Admissions, Enrollments, Fees Accounts, etc.

- It will drastically reduce your administrative costs, as it now requires very few staff to accomplish tasks being carried out by many staff when those tasks were done manually.

- Because it requires absolutely no supervision, it saves you valuable time and gives you freedom to concentrate on more strategic areas of your school operation.

- Because it reduces the use of papers in your school which eventually liter the school environment, it helps maintain a cleaner and friendlier environment making your school premises eco-friendly.

⬛ Smart School Features

Take Away the Drudgery from your
Teachers & Allow them to focus on your most Prized Asset Your

SmartSchool will take care of most routine tasks associated with day to day school administration thereby relieving your teachers of unnecessary distractions and affording them more time and energy to focus on their core competency and primary duty of imparting knowledge to your pupils. This will:

- Increased teachers productivity and efficiency

- Encourage specialization and professionalism which translates to better service delivery, business development and growth
